Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 March 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Objections

1. Claims 4-9 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,464,388 to Merte et al in view of US 5,702,358 to Witherspoon et al. Merte discloses a variable ratio cardioplegia device with a mixing system 106 and a displacement pump 104 that is connected to a recirculation line 126 for recirculation of the cardioplegia mixture. The device includes a blood source and a cardioplegia source 114 and blood source 122 that are mixed via valves and solenoids that are operated by means of a controller 148 that controls the operation of the solenoids to provide a determined fluid mixture. (See FIG 5, column 5.) Merte fails to disclose that the blood and cardioplegia supply is controlled by chamber wheels or pumps. Witherspoon discloses a variable ratio cardioplegia delivery device with circular roller pumps disposed on each supply tube, allowing the ratio of blood to cardioplegia solution to be controlled according to

operator desire via pressure or flow rate measurements. Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to substitute the pinch valves of the Merte device with the roller pumps of the Witherspoon device so that the controller may control the flow rate of the fluids to be combined, as taught by Witherspoon.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure
